

| Parameter                         | RE-5L, seria 4  |            | RE-5L, seria 5  |            |
|-----------------------------------|-----------------|------------|-----------------|------------|
|                                   | manually        | man./ auto | manually        | man./ auto |
| Activation                        | manually        | man./ auto | manually        | man./ auto |
| Weight                            | 7,2 kg          | 7,5 kg     | 6,9 kg          | 7,20 kg    |
| Size in cm (length, width, thick) | 77 x 37 x 6     |            | 55 x 37 x 8     |            |
| max. Pilots wight                 | 115 kg          |            | 115 kg          |            |
| max. activation speed             | 327 km/h        |            | 327 km/h        |            |
| Rate of descent at 77kg weight    | 6,1 m/s         |            | 6,1 m/s         |            |
| Self propulsion                   | 1 -2 m/s        |            | 1 -2 m/s        |            |
| steerable                         | yes (in Limits) |            | yes (in limits) |            |
| re-pack interval                  | 360 days        |            | 360 days        |            |
| Life time                         | 15 years*       |            | 15 years*       |            |
| Certification                     | TSO/ ETSO       |            | TSO/ ETSO       |            |

\* Starting with manufacturing year 2004, life time prolongation upto 20 years possible, depending from technical contition of the rig.

RE-5L, seria 4  
(long pack tray)

RE-5L, seria 5  
(short pack tray)

**valid for both series:**

- activation only manually or manually/ automatic (Static Line)
- Pack Tray colours red or blue
