Main parachute RL-18 Parameter

Area:	274 sqft
No. of aircells:	7
Rate of descent:	3,2 m/s (100kg payload)
Min. deployment altitude:	400 m
Max. suspended weight:	130 kg
Max. dropping speed:	250 km/h
Self propulsion:	8-9 m/s
Reduce opening shock:	slider

RL-18 is a typical Student canopy which is safe and soft in opening. Handling is easy, any critical stall-position during the flight is impossible. Controlling and landing like a normal accuracy canopy. Low sinking speed.
