

Troop Parachute RS-4/4 T

Nato-Stock-No.: 1670-12-363-4117

SPEKON[®]
made in Germany since 1842

The RS-4/4T parachute is a steerable Troop Parachute for automatically opening which can be used for general training of parachutists and for armed forces operations. The parachute canopy has a special form and special arrangement of fabric with varying air permeability, which results in the excellent aerodynamic characteristics.

The RS – 4/4 T parachute guarantees:

- Great directional, descent and landing stability
- Steering of the unfolded canopy and braking the advance velocity
- Separation from the parachute canopy after landing on the ground
- Combination with a chest-mounted reserve parachute
- Quick release from harness
- Exchangeability of all units
